

Forest Jacket 3.0

Versatile and hard-wearing all-weather GORE-TEX jacket for high-intensity activity in a range of outdoor environments. The highly adjustable and spacious fit can easily accommodate extra layers of clothing. Suitable for autumn, winter and spring (+15 to -50 °C depending on clothing worn and activity undertaken). The jacket has a GORE-TEX liner for added tear and puncture resistance. The design is also very effective at preventing the build-up of moisture at low temperatures by creating an additional insulating layer between the outer fabric and inner liner.
